

NURSING

Excelling in nursing requires more than medical knowledge and the demonstration of technical skills. Soft skills like active listening, critical thinking, and communication are all vital to providing safe and competent patient care. Collaboration is also necessary for success since nurses and doctors often work together to develop a holistic treatment plan for each patient.

But how can you provide enough skill practice and personalized learning opportunities in a face-to-face or online course to master these competencies?

Bongo helps instructors develop learners' skills and deliver personalized feedback at scale with its structured video workflows.

WHAT BONGO ENABLES:

EXPERIENTIAL EXERCISES

Instructors can create real-world scenarios where learners articulate knowledge on the spot, demonstrate key soft skills, or analyze patient-nurse interactions via video.

GROUP COLLABORATION

Learners can meet with their peers synchronously or asynchronously to role-play hospital situations or discuss treatment plans as a team.

PERSONALIZED COACHING

After submitting a video recording, learners can receive personalized feedback and coaching from instructors on how to improve.

PEER REVIEW

Learners can watch their peers perform a technical skill, provide feedback and coaching, and reflect back on their own demonstration.

“ When we went to more online classes, we were experiencing difficulties in some of the traditional activities that the students did. One of the main ones was oral presentations -- how to now enable students to do an oral presentation in the online format.... They're often working students who took an online class assuming they could access it at their convenience. We had to find how to maintain those oral presentations for an online group, and YouSeeU filled that void for us. ”

MARSHA ORR, MS, RN
California State University Fullerton, School of Nursing

Bongo's proprietary video technology helps evaluators assess candidates' knowledge and soft skills at scale.

HOW WE DO IT:

ASYNCHRONOUS VIDEO ASSIGNMENTS

Bongo's video workflows support activities like skill demonstrations and situational analysis from anywhere, on any device.

SYNC COMMENTS

These time-stamped comments drive improvement by giving learners direct evidence of their strengths and weaknesses.

SYNCHRONOUS VIRTUAL CLASSROOM

Our web conferencing tool facilitates real-time interactions between learners, their peers, and the instructor via video.

SEAMLESS INTEGRATION

Bongo integrates into nearly every learning management system, ensuring grades within the platform automatically upload into your gradebook.

VIDEO FEEDBACK

Along with text-based comments, instructors can also provide video feedback to increase engagement and give more personalized coaching.

Bongo (formerly YouSeeU) is a video assessment & soft skill development platform. With its proprietary video technology and powerful feedback capabilities, Bongo enables the mastery of communication, collaboration, and critical thinking. Bongo was founded in 2009 and is headquartered in Loveland, Colorado.
