

PHYSICAL THERAPY

Excelling in physical therapy requires more than medical knowledge and the demonstration of physical skills. Soft skills like active listening, critical thinking, and communication are all vital to providing safe and competent patient care. Collaboration is also necessary for success since physical therapists often work together to develop a holistic healthcare plan for each patient.

But how can you provide enough skill practice and personalized learning opportunities in a face-to-face or online course to master these competencies?

Bongo helps instructors develop learners' skills and deliver personalized feedback at scale with its structured video workflows.

WHAT BONGO ENABLES:

EXPERIENTIAL EXERCISES

Instructors can create real-world scenarios where learners practice therapeutic techniques, demonstrate key soft skills, or analyze patient-therapist interactions via video.

GROUP COLLABORATION

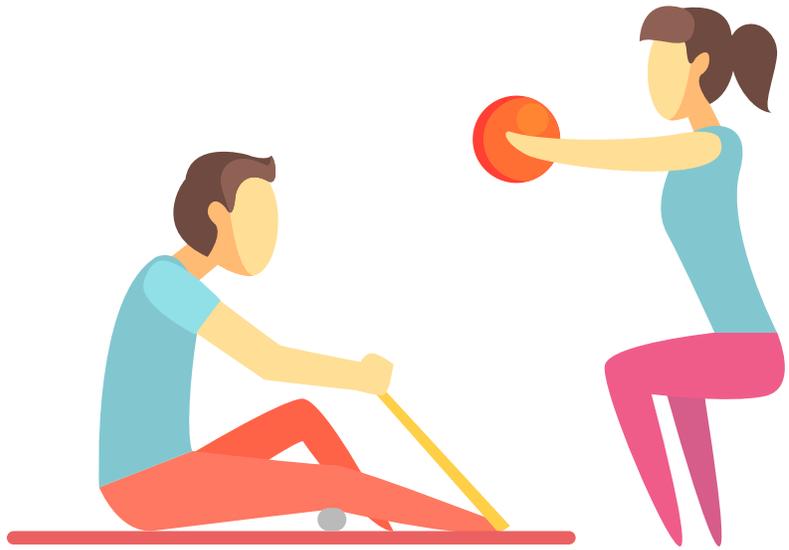

Learners can meet with their peers synchronously or asynchronously to role-play a patient-therapist interaction or discuss mock situations as a team.

PERSONALIZED COACHING

After submitting a video recording, learners can receive personalized feedback and coaching from instructors on how to improve.

PEER REVIEW

Learners can watch their peers perform a physical skill, provide feedback and coaching, and reflect back on their own demonstration.

Bongo helps instructors assess learners' soft skills and the application of knowledge at scale.

HOW WE DO IT:

ASYNCHRONOUS VIDEO ASSIGNMENTS

Bongo's video workflows support activities like skill demonstrations and situational analysis from anywhere, on any device.

SYNC COMMENTS

These time-stamped comments drive improvement by giving learners direct evidence of their strengths and weaknesses.

SYNCHRONOUS VIRTUAL CLASSROOM

Our web conferencing tool facilitates real-time interactions between learners, their peers, and the instructor via video.

SEAMLESS INTEGRATION

Bongo integrates into nearly every learning management system, ensuring grades within the platform automatically upload into your gradebook.

VIDEO FEEDBACK

Along with text-based comments, instructors can also provide video feedback to increase engagement and give more personalized coaching.

bongo™

Bongo (formerly YouSeeU) is a video assessment & soft skill development platform. With its proprietary video technology and powerful feedback capabilities, Bongo enables the mastery of communication, collaboration, and critical thinking. Bongo was founded in 2009 and is headquartered in Loveland, Colorado.
