

PUBLIC SPEAKING

The ability to communicate and articulate knowledge effectively is not just important for students in a public speaking class — it's critical for career success. In traditional, face-to-face environments, learners usually have a small window of time to show what they can do.

And because there are so many students, instructors rarely have time to give pointed, personalized coaching to each individual. This makes it more difficult for learners to actually improve on key communication skills.

With Bongo, not only do learners have more opportunities to practice public speaking, but instructors also have a chance to provide valuable feedback to every individual without using precious class time.

WHAT BONGO ENABLES:

MAKE MORE SPEECHES

Because Bongo lets learners create video presentations on their own time, instructors can assign more speeches without making the entire class listen to them individually.

UNLIMITED PRACTICE OPPORTUNITIES

Bongo's Video Assignments allow learners to create video presentations, self-critique them prior to submission, and re-record if necessary.

PERSONALIZED LEARNING

After submitting a video presentation, learners receive personalized feedback and coaching from instructors on how to improve.

PEER REVIEW

Instructors can enable peer review on any Video Assignment, which exposes learners to multiple perspectives and teaches them how to give and receive constructive criticism.

“ One thing [Bongo] helps with is it makes students plan a little bit more, because they know there’s going to be a public record of what they do. While the videos aren’t out there like YouTube, I set it up assignments so other students can give feedback. ”

KATHLEEN GOLDEN
Professor
Edinboro University

Bongo’s Video Assignments help instructors assess and improve learners’ soft skills at scale.

HOW WE DO IT:

ASYNCHRONOUS VIDEO ASSIGNMENTS

Bongo’s video technology allows learners to create presentations and practice public speaking from anywhere, on any device.

VIDEO FEEDBACK

Along with text-based comments, instructors can also provide video feedback to increase engagement and give more personalized coaching.

SYNCHRONOUS VIRTUAL MEETINGS

Learners can also connect with their peers and instructor in real-time to deliver speeches in an online, face-to-face environment.

PEER REVIEW

Multiple ways for students to provide feedback to their peers increases critical thinking and the ability to give constructive criticism.

SYNC COMMENTS

Time-stamped comments drive improvement by giving learners direct evidence of their strengths and weaknesses.

SEAMLESS INTEGRATION

Bongo integrates into nearly every LMS, ensuring a seamless learning experience and enabling grades to be automatically uploaded into your gradebook.

Bongo (formerly YouSeeU) is a video assessment & soft skill development platform. With its proprietary video technology and powerful feedback capabilities, Bongo enables the mastery of communication, collaboration, and critical thinking. Bongo was founded in 2009 and is headquartered in Loveland, Colorado.
